

Volcanoes

To draw and label a diagram of an erupting volcano using technical vocabulary. You might need to re-search this on the internet or using a book.

Volcanoes

What are the most famous volcanic eruptions? Carry out some research into where and when they happened. You could turn this information into a fact sheet.

Earthquakes

Why do earthquakes happen? Find out about the 3 different ways the Earth's plates can move to make an Earthquake.

Year 3 Curriculum

Homework

This is your topic homework. You should try to finish this menu this half term. You can do this doing one a week.

Please hand in your homework no later than Monday 17th October.

When an earthquake happens...what can happen to the weather? What changes can it make? Describe in a short paragraph and draw a picture.

Write an **exciting story** where a volcano explodes and you have to escape.

- What will you see?
- Where will you run to?
- Will all of your family be safe?
- What will happen to your house?

Make a **glossary** of the words linked to volcanoes and earthquakes and write what they mean. The best one could be used in the classroom to help our learning.

E.g. Dormant: A volcano that has not erupted in a long time

Write a guide to explain what you could do to stay safe in a volcano eruption or an earthquake.

- What are the best things to do?
 - Where should you go?

Draw pictures to go with your ideas
